Interpersonal life promoting communication from the ♥

* Bridging the gap between communities

* Earth intelligence – Info – Confidence to do these things

Finding abundance in scarcity

* Establishing interconnectedness

No cars

Rekindling the connection to nature

We are all modeling

Gathering

Retrieval of indigenous information

Integration of age groups

Bioregionalism as the key to success

Ecovillage as a nucleus in the implementation of permaculture principals

Build trust

Vision

(re relationships, communication: how will our community interrelate to manifest our goals?)

Me as H2O drop: ♠. Irrigating, carrying nutrients, renewal, collective wisdom to plants & animals & people, who all nurtured by me & millions of other drops, are flourishing in mutual harmony. Gardens, trees, flowers abound. Bees buzz, birds sing. People meet in beautiful, peaceful spaces that they reach by bike. The bike wheels are all attuned to each other: as we ride, harmony fills the air.

We all exchange what we have: smiles, songs, kind words – in mutual joy & respect. Animals too. We rub each other. We look in each other's eyes, & just ARE.

Surprising thing: vision of myself & others carrying sustenance & renewal to each other.

Theme: Slow down, relate to each other, the earth & putting our energy into what is truly precious.
Stop using “busyness” as an excuse not to talk w/each other.

Becoming Indigenous

Use technology to produce value not stuff.

Earth based vs. Technology based Humans

Returning to a Tribal Paradigm

One that recognizes Limits

Security provided by Society

What we learn is pertinent to our survival

Need to learn → Books

→ Observation

Preserving what’s valuable

Letting go what’s not

Home/family based

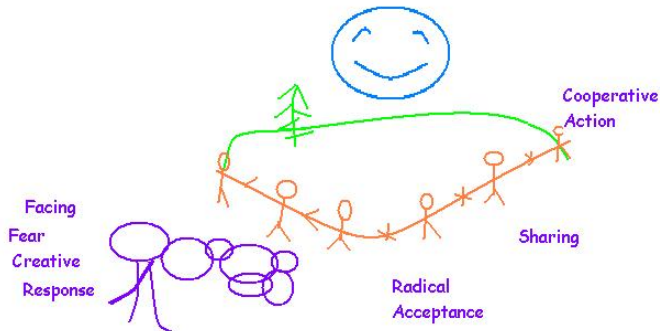

Reflect on how people’s of past provided for themselves.

Grow where you’re planted!

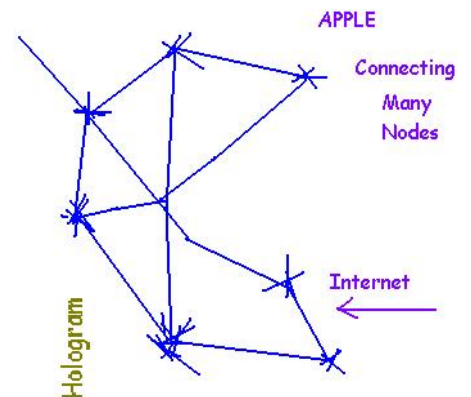

Community Vision

Alliance for a Post-Petroleum Local Economy

Localization ← Distributed (not centralized) Resources
(Energy, Democracy, Food)

Building the Commons
Social Innovation

- Desire for intentional community – more rural
 - Sense of “despair “ about our current situation
 - Integrated earth-based structures
 - Local Food Production
 - Local creative culture
-
